SMITH AND FOX ISLANDS Growing Area # 004 Northampton County Shoreline Sanitary Survey

Date: 2 March 2006

Survey Period: February 28, 2006

Total Number of Properties Surveyed: 1

Surveyed By: R.S. Bisker and P.H. Widgen

SECTION A. – GENERAL

This survey has no reference points but includes the shoreline of parts or entire islands in the vicinity of the subject islands adjacent to the Chesapeake Bay, Tangier Sound, and Pocomoke Sound; also Shanks Creek (Spain Cove and Fishing Creek), Amen Corner, Tyler Creek (South Point Gut), Horse Hammock Gut, Upper Horse Hammock Ditch, Middle Horse Hammock Ditch, Lower Horse Hammock Ditch, Cedar Straits (Ellinger Cove, Green Straits, and Planner Cove), Great Thorofare, and all of their tributaries. The islands included are Smith, Shanks, Cheeseman, Sedge, Herring, House, Clump, Great Fox, Green Harbor, Does Hammock, and Big Ledge. All of these islands are small to medium in size and consist of low elevation marshlands.

Meteorological data indicated that no rain fell the week of the survey period.

There is only one property in this survey area which is located adjacent to Great Fox Island on pilings. This property is a remote educational center for the Chesapeake Bay Foundation. The local health department has approved the use of a Clivis Multrum composting tank for sewage and a rotating disk evaporator system for kitchen and laundry wastes for this facility.

Currently there are no restrictions on harvesting of shellfish in this area.

Information in this report is gathered by and primarily for use of the Division of Shellfish Sanitation, Virginia Department of Health, in order to fulfill its responsibilities of shellfish growing area supervision and classification. Data in the report is also made available to local health departments and other agencies to address items that may be out of compliance with their regulatory programs.

This report lists only those properties which have a sanitary deficiency or have other environmental significance. “**Direct**” indicates that the significant activity or deficiency has a direct impact on shellfish waters. Individual field forms with full information on properties listed in this report are on file in the Richmond Office of the Division of Shellfish Sanitation and are available for reference until superseded by a subsequent survey of the area.
